OUR GOAL— 100% CUSTOMER SATISFACTION

We have and will continue to invest in the people, technology and systems necessary to stand within the top ranks of our industry. We offer the finest caliber products and services, so you can pass that value along to your patients.

Group Practice Solutions has gathered a professional team of specialists representing every discipline you require from a lab.

We maintain working relationships with major manufacturers, each of whom specializes in a particular area of expertise. In many instances, we are directly involved with manufacturers in the development of new technologies and products. That's added value you simply do not find everywhere.

You'll find our people courteous, knowledgeable and willing to help in any way possible. If a question arises regarding any aspect of your case, we will call you to make certain your expectations are met. From initial contact and order entry, through fabrication and shipping, we remain accountable to you... and strive to exceed your every expectation.

Our position in the industry enables us to keep abreast of every advancement, assuring you of the latest advantages in dental technology. In today's complex and competitive climate, you need a laboratory as dedicated to your success as you are.

As esthetic dentistry continues to drive patient demand for services and new products. Group Practice Solutions has expanded its line of services beyond the range of traditional restorations.

COSMETIC RESTORATIONS

Thanks to advances in esthetic materials and technology, cosmetic restorations not only look beautiful, but are also increasingly durable and functional. Products offered include new and long-trusted materials that satisfy a broad range of restorative and cosmetic challenges.

Feldspathic Porcelain

VITA® products

Pressed or Milled Ceramics

IPS e.Max®

Zirconia

BruxZir®, DSz™, DSz™

Esthetic Provisionals

When esthetics is crucial and you need extra time to plan, evaluate and complete the final restoration this is an excellent provisional, very stable insuring no loss of vertical or abutment tooth shift during treatment.

CROWN AND BRIDGE SERVICES

Group Practice Solutions provides virtually every fixed restorative product on the market, including CAD/CAM milled, printed and traditional crowns and bridges. With the ability to accept scans from all types of intra-oral scanning devices, we can collaborate with you to create any fixed restoration required.

Our range of materials includes

- Porcelain Fused to Metal (Base, Noble, High-Noble)
- Full Cast (Base, Noble, High-Noble)
- e.Max®
- Captek
- Full Contour Zirconia
- Porcelain Fused to Zirconia
- BruxZir®

IMPLANTS & ATTACHMENTS

Implants continue to grow in popularity as restorative and cosmetic success becomes easier to achieve. Advancements come to market every year and our technicians stay current on the latest developments. We also have digital capabilities for leading implant systems and accept digital impressions, providing precision and cosmetic success. Restorative options include stock abutments, patient and manufacturer specific custom milled abutments in titanium and zirconium, cementable and screw-retained over dentures and screw-retained hybrid dentures. We have years of experience and partner with all major implant brands.

Precision & Semi-Precision Attachments

Our technicians coordinate your combination fixed and removable attachment cases throughout their progress assuring a successful interface between components.

SLEEP THERAPY

With over 20 years of experience in dental sleep therapy, Group Practice Solutions provides a full choice of oral appliances to treat snoring and sleep apnea. We provide FDA-approved oral appliances, including the Adjustable PM Positioner™, SomnoDent® and TAP®. Internationally recognized for our expertise, our dental sleep technicians can help choose the right appliance for each patient circumstance.

REMOVABLE PROSTHETICS

Select Full Dentures™

Our most popular complete denture includes the Dentsply's Lucitone 199 acrylic, and heat cured IPN denture teeth.

Value™ Full Dentures

A sturdy, no-frills denture for those more concerned with function and price. This denture features Lucitone 199 acrylic and hardened denture teeth.

Acrylic partials are offered in the Value™ unless otherwise requested.

Flexible Partial and Complete Dentures

Our flexible partial denture line features materials in the nylon family stronger and more flexible than the based acrylics used in other kinds of dentures and partials. Nylon based materials are often recommended as a viable alternative for full dentures in patients who have allergic reactions to Methyl-Methacrylate.

CAST PARTIAL DENTURES

Chrome Cobalt Alloy

Our cast partials feature a premium chrome/cobalt alloy. This nickel- and beryllium-free alloy can be cast lighter than most other nickel-free alloys.

Our cast partial technicians can provide you with cast partial designs that go to place easily. For a more cosmetic solution, simply prescribe EsthetiClasp™ for your patients.

ORTHODONTIC SERVICES

We offer a complete line of Orthodontic and Orthopedic fixed and removable appliances as well as a complete line of splints. Our innovative laser welding techniques provide significantly stronger joints than traditional soldering for bands and wires, while acrylic appliances can be customized with fun colors, glitter, decals or pictures.

Whether you are considering single tooth movement, bilateral development, repositioning the mandible or anterior-posterior corrections, our technical staff is ready to assist you in choosing an appliance for mixed or permanent dentition.

Group Practice

Solutions

has long been

recognized for its

ability to deliver

quality as well as

the broadest range

of technological

expertise in the

industry.
